Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiota et al. U.S Patent No. 6,324,521, in view of Walker et al. U.S. Patent No. 6,754,636.

4. Shiota discloses a network photograph service system comprising a first terminal (see 6, figure 1), which carries out a processing of images and transmits them to a central server via a network, said images being stored on the hard disk of the central server, and where said images are transferred to a second terminal in accordance with order information identifying said images (column 10 lines 9-20). Shiota teaches, "network as represented by the Internet" (column 2 lines 56-57).

Art Unit: 3624

5. Shiota fails to teach transmitting an identification number along with said processed images to a central server, and transmitting said identification number from a second terminal to said central server.

6. Walker discloses an on-line service providing method (figures 1-26c) comprising carrying out a combination of information at a first terminal (i.e., "buyer device" 210) and transmitting combined information and an identification number via the Internet 110 to a commerce provider server (i.e. seller device 510). Also, Walker discloses a store site (column 15, lines 56-67) having a second terminal and thus allowing for information to be inputted and transmitted to the commerce provider server.

7. It would have been obvious to one of ordinary skill in the art at the time of the Applicant's invention to include the identification number feature of Walker in the photograph service system of Shiota in order to allow the customer to track orders, and to allow customers to place orders using said identification number, directly from said second terminal.
